

The following list of safety risks is based on the requirements of Regulation (EU) 2023/988 on general product safety (GPSR). The aim is to protect users from potential hazards of inappropriate use. The warnings are worded in a simple and understandable way to be accessible to the general public.

Product category risk analysis: WATER FILTER JUGS AND BOTTLES

AK 170.3 - JUG WATER FILTER CARTRIDGES 3 PCS.

WATER BOTTLES AND JUGS

General risks and precautions to prevent the risks:

Before use

Read and follow the manufacturer's instructions on the packaging or added to the packaging. If you have any questions about the use, contact the manufacturer.

Use filters that are compatible with your jug/bottle; the filters should be used in a designated place.

Use the filters for their intended purpose.

Keep the packaging and filters out of reach of children. Do not leave any parts in places where they can be a tripping hazard.

1. Microbiological risks – health hazard

If you do not use the filter correctly or do not replace it regularly, it can lead to the growth of microorganisms. Change the filter regularly, as recommended by the manufacturer. Store the jug and filter in a dry place to avoid excessive moisture.

2. Chemical risks – water pollution

If you do not follow the instructions to replace the filter, it can affect the quality of the water you are drinking. Use the filters recommended by the manufacturer which are compatible with your jug. Before use make sure that the filter is properly fitted.

3. Risk of mechanical damage

If you drop the bottle/jug, it can break, you can be injured or the appliance may no longer be watertight.

4. Risk of long-term water storage

Do not leave water in the bottle/jug for more than 24 hours because water quality can deteriorate.

5. Risk of inadequate cleaning

Wash the bottle/jug regularly, preferably by hand using mild detergents. Avoid using sharp cleaning tools that can scratch the surface. If you do not clean your appliance regularly, it can lead to limescale build-up.

The following list of safety risks is based on the requirements of Regulation (EU) 2023/988 on general product safety (GPSR). The aim is to protect users from potential hazards of inappropriate use. The warnings are worded in a simple and understandable way to be accessible to the general public.

Before first use, follow the recommendations for rinsing and activating the filter. Do not use a filter that is mechanically damaged.

Additional information: After prolonged disuse, wash the jug thoroughly and put in a new filter. Use only cold water that is safe to drink. Do not pour boiling water into the jug to avoid material damage or deformation. If the filter is defective, it can affect the quality of the filtered water.
